FOR IMMEDIATE RELEASE

Equipment Connectivity Software Supplier Cimetrix Offers Assurance Plan

SALT LAKE CITY, UT — May 1, 2009 — Cimetrix, Incorporated (OTC BB: CMXX) (www.cimetrix.com), a leading provider of [fab and equipment connectivity software to the global semiconductor industry](#), introduced today the [Cimetrix Assurance Plan \(CAP\)](#) to enable easy migration to Cimetrix solutions from legacy systems.

Following Asyst Technologies widely publicized [voluntary chapter 11 petition filing](#), many members of the semiconductor community have begun to research alternative [connectivity software solutions](#) and potential new strategic partners. Cimetrix has received inquiries from several concerned customers and is ready to offer help and support wherever needed.

The Company stated the purpose of CAP is to minimize the risk, interruption and pain often associated with unforeseen supplier issues.

The program includes various options including:

- competitive upgrades
- accelerated training
- support assistance for legacy systems
- transition tools

Plans will be customized based on the specific needs of each individual customer. In addition, Cimetrix plans to work with automation solutions providers to offer an EFEM upgrade option to CAP customers.

“The semiconductor industry has been hit hard by the current economic conditions and no one company has been left unaffected,” says Dave Faulkner, the Company’s executive vice president of sales and marketing. “Cimetrix developed this program to assist and support concerned customers, providing them with a safe and reliable connectivity software solutions option for moving forward.”

More information regarding the details of the [Cimetrix Assurance Plan](#) is available on the Company’s website at <http://www.cimetrix.com/cimetrix-assurance-plan.cfm>.

Additionally, interested parties that currently use Asyst’s products, including [GWGEM™](#), [ConX300™](#), and [EIB \(Equipment Information Bridge\)™](#), can request detailed information on comparable connectivity solutions from Cimetrix.

About Cimetrix Incorporated (www.cimetrix.com)

Cimetrix designs, develops, markets, and supports factory automation and equipment control software for the global semiconductor, photovoltaic, and electronics industries. A leading participant in SEMI standards development, Cimetrix’s connectivity software allows for quick implementation of the [SECS/GEM](#), [GEM300](#) and [EDA](#) standards.

The Company’s products can be found on virtually every tool type in nearly every semiconductor 300mm factory worldwide. The added-value of Cimetrix’s passionate support and professional services creates the industry’s only complete software solution. Key products include:

- [CIMControlFramework™](#)
- [CIMConnect™](#)
- [CIM300™](#)
- [CIMPortal™](#)

Cimetrix is an active member of Semiconductor Equipment and Materials International (SEMI), including the SEMI PV Group, and participates in various International SEMATECH Manufacturing Initiative (ISMI) programs.
