

iNEMI Announces Results of Board of Directors Election

iNEMI | 04-07-2022

Four directors have been re-elected to the iNEM Board plus we have added a new Director. Help welcome Dr. Andy Mackie (Indium Corporation) our newest Board member and congratulate Mc Aghazadeh (Intel), Dr. Ravi Bhatkal (MacDermic Alpha Electronics Solutions), Ranjan Chatterjee (Cimetrix by PDF/SOLUTIONS) and Dr. Hannes Voraberger (AT&S) on their re-election.

Roadmap Will Launch with Three Pilot Topics

Following our recent roadmap webinar — “The iNEMI Roadmap Refresh: from Lord Rings to Wikipedia” — we are now launching the next phase of the new online iNEM Roadmap. We are running pilots for three topics — 5G/6G materials and testing, sm manufacturing and flexible hybrid electronics — targeting online publication by mid-y Interested in shaping industry consensus on these and other topics in electronics manufacturing? Please fill out our expression-of-interest form to get involved with the iNEMI Roadmap. Contributing to the roadmap is a great opportunity to shape the fut technologies in electronics manufacturing with the needs of the industry in mind, and participation provides a powerful means to validate your organization’s understandin the critical application drivers and technology challenges.

We Need Your Input on Smart Manufacturing Maturity in Your Organization

The iNEMI Smart Manufacturing Technology Integration Group (TIG) is surveying our members and the electronics industry at large to help define and develop future iNE collaborations in smart manufacturing. Input from this survey will help us identify common areas of need where it makes sense for industry to work together to enable deployment of smart manufacturing. The survey specifically asks about stages of implementation for smart manufacturing within an organization, use of artificial intelligence/machine learning (AI/ML) for PCBA/SMT processes, use of digital twins for PCBA/SMT processes and use of digital twins for the electronics manufacturing industry.

Marco Van Oosterhout, Product Marketing Director for Kulicke & Soffa, recently talked to iNEMI about the importance of smart manufacturing solutions and encourages electronics manufacturing companies to participate in the iNEMI survey.
